Indian Ocean Forecast System (INDOFOS)

High Wave Warning

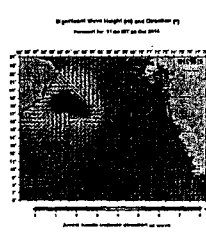

Issue Date: 29-10-2014 Region:Gujarat

High swell waves in the range of 2.0 - 2.5 meters are forecasted during 11:30 hours on 29-10-2014 to 23:30 hours of 30-10-2014 along the coast from Jakhau to Diu Head of Gujarat coast.
Current speeds vary between 40 - 81 cm/sec.

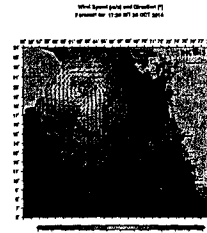

The very severe cyclonic storm, ?NILOFAR? over westcentral Arabian Sea moved nearly northward in past 12 hours, and lay centred at 0530 hours IST of today, the 29th October, 2014 near latitude 18.20 N and longitude 62.00 E, about 900 km southwest of Naliya (Gujarat), 910 km southwest of Karachi (Pakistan) and 420 km southeast of Masirah (Oman). It would move north-northeastwards during next 12 hours and then northeastwards and cross north Gujarat and adjoining Pakistan coast around Naliya by 01st November forenoon. However, as the system would come closer to Gujarat coast, it would weaken and cross the coast as a cyclonic storm.

Fishermen are advised not to venture into the sea.
